Biogeochemistry **42:** 355–356, 1998.

Contents Volume 42 1998

Volume 42, Nos. 1–2 August 1998

NICO VAN BREEMEN & ADRIEN C. FINZI / Plant-soil interactions: ecological aspects and evolutionary implications 1–19

EUGENE F. KELLY, OLIVER A. CHADWICK & THOMAS E. HILINSKI / The effect of plants on mineral weathering 21–53

DENIS A. ANGERS & JEAN CARON / Plant-induced changes in soil structure: Processes and feedbacks 55–72

FRANK BERENDSE / Effects of dominant plant species on soils during succession in nutrient-poor ecosystems 73–88

DAN BINKLEY & CHRISTIAN GIARDINA / Why do tree species affect soils? The Warp and Woof of tree-soil interactions 89–106

G.R. GOBRAN, S. CLEGG & F. COURCHESNE / Rhizospheric processes influencing the biogeochemistry of forest ecosystems 107–120

INGRID C. BURKE, WILLIAM K. LAUENROTH, MARY ANN VINTON, PAUL B. HOOK, ROBIN H. KELLY, HOWARD E. EPSTEIN, MARTIN R. AGUIAR, MARCOS D. ROBLES, MANUEL O. AGUILERA, KENNETH L. MURPHY & RICHARD A. GILL / Plant–soil interactions in temperate grasslands 121–143

HOWARD E. EPSTEIN, INGRID C. BURKE, ARVIN R. MOSIER & GORDON L. HUTCHINSON / Plant functional type effects on trace gas fluxes in the shortgrass steppe 145–168

WILLIAM H. SCHLESINGER & ADRIENNE M. PILMANIS / Plant-soil interactions in deserts 169–187

ROBERT R. NORTHUP, RANDY A. DAHLGREN & JOHN G. McCOLL / Polyphenols as regulators of plant-litter-soil interactions in northern California's pygmy forest: A positive feedback? 189–220

JOSHUA P. SCHIMEL, REX G. CATES & ROGER RUESS / The role of balsam poplar secondary chemicals in controlling soil nutrient dynamics through succession in the Alaskan taiga 221–234

DANIEL MARKEWITZ & DANIEL D. RICHTER / The *bio* in aluminum and silicon geochemistry 235–252

Volume 42 No. 3 September 1998

AMI NISHRI, TAMAR ZOHARY, MOSHE GOPHEN & DAVID WYNNE / Lake Kinneret dissolved oxygen regime reflects long term changes in ecosystem functioning 253–283

ALAN R. HILL, CARL F. LABADIA & K. SANMUGADAS / Hyporheic zone hydrology and nitrogen dynamics in relation to the streambed topography of a N-rich stream 285–310

REX E. KERSTETTER, RICHARD G. ZEPP & L.H. CARREIRA / Peroxidases in grass dew derived from guttation: possible role in polymerization of soil organic matter 311–323
B. SEELY, K. LAJTHA & G.D. SALVUCCI / Transformation and retention of nitrogen in a coastal forest ecosystem 325–343
